Quick Start Guide

Get up and running with The Simpsons API in minutes. No authentication required.

Base URL

[Docs](#) [About](#) [Example](#)requires no authentication.

Your First Request

Let's start by fetching a single character. Try this example:

Get Homer Simpson:

<https://thesimpsonsapi.com/api/characters/1>

Response Format

All responses are returned in JSON format with consistent structure:

```
{  
    "id": 1,  
    "age": 39,  
    "birthdate": "1956-05-12",  
    "gender": "Male",  
    "name": "Homer Simpson",  
    "occupation": "Safety Inspector",  
    "portrait_path": "/character/1.webp",  
    "phrases": [  
        "Doh!",  
        "Why you little...!",  
        "Woo-hoo!",  
        "Mmm... (food)... *drooling*",  
        "Stupid Flanders!",  
        "Shut up Flanders!",  
        "AAAAGHH!",  
        "Lisa, knock off that racket!",  
        "Uh oh, the boss.",  
        "Lets all go out for frosty chocolate milkshakes!",  
        "Whatever, Ill be at Moes.",  
        "I am evil Ho-mer! I am evil Ho-mer! I am evil Ho-mer!",  
        "Better them than me.",  
        "Better them than me... Oh wait, that was me.",  
        "Marge, my face hurts again!"  
}
```

Note: This example shows the main fields. The actual response may include additional fields depending on the endpoint.

💡 Pro Tips

- Images are served via CDN for optimal performance
- Each page contains exactly 20 items (pagination cannot be customized)
